

Interactive Digital Art and Design SE608

Project Proposal Year IV

Student Name:	Sofia Pankiv	Student Number:	C00301189
Working Title:	Interactive Poster Generator		
Description:	A website with basic options of choices as: – Colours – Graphic elements (png pictures, edited elements, gradients, etc) – Text (date, event name, etc) – Choice of fonts – Textures The website would put it in random composition. User will be able to adjust positions of elements and colour using a bar and buttons underneath the poster canvas. After everything's done user will have an idea or their inspiration for the next project.		
Reasons for selecting project:	- I'm interested in graphic design as such creating posters. - Project combines my skills in graphic design and coding. - It gives an opportunity to experiment with colours, textures, composition and typos.		
Proposed research content:	- Composition and poster design - Latest style trends - Coding: - o Html - o CSS - o JavaScript - o Algorithms for randomising		
External links (if applicable):	https://www.giacomo.works/random-poster/		
Hardware requirements:	Laptop, mouse, keyboard		
Software requirements:	Html, CSS, JavaScript, Visual Studio Code, Photoshop, Illustrator, Browser, Figma, Github		
Other requirements:	A collection of original textures, graphic elements, fonts, way to save generated posters, User testing
